REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant's remarks are persuasive regarding the dyes of the two primary references. Applicant states that the dyes do not conform to the claimed dyes which "possess one substituent and/or component combination with a ligand character that is capable of forming a nickel complex with nickel ions." The definition of said term is in the specification in the paragraph bridging pages two and three. Accordingly the rejection of the claims under 102 and/or 103 based on WO 98/554264 and/or WO 98/58025 are withdrawn. Regarding the rejection of the product claims, while the dyed layers have the requisite lightfastness and the oxide layer may be the same, the dye layer is necessarily different.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
